RELEVANT EXPERIENCE

IT Junior Technician | ASUS REPAIR CENTER TOTAL SOLUTION, Melbourne

As an IT Technician at TOTAL SOLUTION, Melbourne's exclusive ASUS Repair Center, I played a pivotal role in diagnosing and resolving hardware and software issues for a diverse range of clients. My responsibilities encompassed a comprehensive evaluation of clients' computer systems, followed by a detailed analysis to determine the most effective repair strategies.

Key Achievements and Responsibilities:

Conducted thorough assessments of clients' computer systems, identifying hardware and software malfunctions. Utilized advanced diagnostic tools and software analysis to pinpoint issues, ensuring precise and efficient troubleshooting.Executed repairs and upgrades on ASUS devices, demonstrating proficiency in handling a variety of hardware components. Provided clear and concise explanations of technical issues to clients, fostering positive communication and understanding.

Contributed to the development of standardized repair procedures, streamlining the overall repair process for increased efficiency.Collaborated with a team of technicians to address complex technical challenges, fostering a cooperative and solution-oriented work environment.

This experience equipped me with a solid foundation in hardware diagnostics, software analysis, and client communication within a specialized IT repair setting. I am eager to leverage this expertise in a new IT role and contribute to the success of your organization.

Web develop intership| B.HANG International CORPORATION

Building a platform of digital **advertising management system**, for advertisers manage their programmatic, searching and linking across different digital channels in the one dashboard. Including the realizing the customer connecting/ editing different data sources Fulfilling customer's own clients management such as CRUD, upgrade operation and generating the report data chart as well. Technologies used include **PHP, JS, UI frameworks**.

Results:

Obtaining the solid knowledge of mathematics and Object-oriented programming (OOP) programming thinking and skill. Building the ability converting the simulation algorithm into practical field system, gain the good acknowledge of communication with the coworker and the team leader.

- **Increased average view results by 20% across other program students.**

Retroactive(Game):Design a isometric temporal racing game with other studio member git

hub_link: <https://github.com/UQdeco2800/2021-studio-7>

- made significant contributions to the development of a game through engagement in various aspects of the design process, including character and furniture design the client.
- Organised and prioritised work to complete assignments in a timely, efficient manner

OTHER WORK EXPERIENCE

Customer Service Representative | SPKLAS CAR WASH

In my role at Sparkles Car Wash, I undertook diverse responsibilities including front desk operations, customer service, and website design. This multifaceted experience not only refined my technical skills but also served as a platform for enhancing my communication abilities. Regular interactions with clients and colleagues provided me with valuable insights into effective communication strategies.

The collaborative nature of the work environment at Sparkles Car Wash instilled in me a strong commitment to teamwork, emphasizing the importance of cooperation and shared goals
